■ This Week's Top 5 Picks

Rank	Symbol	Confidence	Status
1	NXXT	90%	BUY ■
2	IMMR	90%	HOLD ✓
3	AISP	87%	BUY ■
4	DCTH	85%	HOLD ✓
5	CVRX	85%	BUY ■

■ Proposed Trades - Detailed Analysis

1. BUY NXXT

Confidence Score: 90%

Rank: #1 of top 5 picks

Analysis:

Based on our analysis, NXXT demonstrates exceptional fundamental strength, led by explosive 229% YoY revenue growth and a dense calendar of recent positive catalysts. This supports a high-conviction outlook for 2x-5x price appreciation as the company executes its disruptive growth strategy in AI-driven energy. Adding NXXT also enhances our portfolio's diversification by providing targeted exposure to the innovative and non-correlated clean technology and smart microgrid sector.

2. BUY AISP

Confidence Score: 87%

Rank: #3 of top 5 picks

Analysis:

AI SP exhibits exceptional micro-cap growth credentials, with explosive 87% revenue CAGR and a recurring pattern of positive catalysts, including recent major contract wins. Its top-tier Monte Carlo ranking and demonstrated 200%+ price surges on news suggest significant return potential. This position adds targeted exposure to the high-growth AI and government tech sectors, enhancing our portfolio's diversification beyond traditional large-cap holdings.

3. *BUY CVRX*

Confidence Score: 85%

Rank: #5 of top 5 picks

Analysis:

Based on our analysis, CVRX exhibits an aggressive growth profile with explosive revenue expansion and strong near-term catalysts, including favorable FDA labeling and reimbursement changes. The investment offers significant appreciation potential, with an average analyst price target of \$33.00 implying a potential 3.3x return from current levels. Adding this micro-cap position enhances our portfolio's diversification by providing targeted exposure to the innovative medical technology sector, a high-growth area with a return profile that is largely non-correlated to our core large-cap holdings.

4. HOLD DCTH

Current Position: 53 shares @ \$9.35 avg

Current Price: \$9.18

Unrealized P&L;: \$-8.86 (-1.8%)

Status: Remains in top 5 picks

The current unrealized loss is minimal and within normal market volatility. DCTH remains a top conviction pick with an 85% confidence rating, indicating strong projected upside. We are holding to capture the anticipated near-term appreciation.

Status: Remains in top 5 picks

We should continue holding IMMR as the position is performing in line with our thesis, showing a modest unrealized gain. Our analysis maintains a high 90% confidence level, and its inclusion in this week's top picks reinforces the view that it has further upside potential. Holding aligns with our strategic objective of capturing this anticipated growth.

■ Approval Checklist

Review this report carefully before approving trades in the system. Consider the following:

- Do the top 5 picks align with current market conditions?
- Are the buy recommendations affordable within budget constraints?
- Do sell recommendations make sense given current P&L;?
- Is portfolio diversification maintained or improved?
- Are there any tax implications for selling positions?
- Do you have sufficient settled cash to execute buys?

Next Steps: Run the portfolio reviewer to approve/reject each trade, then the portfolio manager will execute approved trades.
